

Eaglehawk Secondary College uses a computer package called XUNO (pronounced 'zoo-no') to manage student information and communicate with parents and students.

Our goal at Eaglehawk Secondary College is that XUNO will become the one stop shop for students, teachers and parents to access a range of school and student information.

There are many features in XUNO, with more being developed. Teachers are gradually using more and more of these features in their teaching and it will become an increasingly important tool for students.

XUNO can be accessed from anywhere, online and on just about any device.

Through XUNO, you will have access to:

- Easy communication with your child's teachers
- Your child's past attendance statistics
- Past reports
- On demand and NAPLAN results
- Notices about school activities
- School calendar
- Tasks set for your child by their teacher

You can access XUNO here: <http://xuno.eaglehawksc.vic.edu.au>

If you would like more information about XUNO or require assistance with logging in, please do not hesitate to contact the college on (03) 5446 8099 and we would be happy to assist you.
